Wood Topia

Make the world a better place

FUDELI  WOODTOPIA

Why choose Woodtopia?

1994

2016

COMPANY PHILOSOPHY

Shaoxing HaoHua Timber Industry Co.,Ltd.is founded in 2016, as a subsidiary of 28-year-history company Zhejiang Fudeli Timber Industry Co.,Ltd., it is a professional manufacturer in engineered wood flooring, herringbone, chevron and different kinds of parquets.

It has been developing into a global international brand with “Woodtopia” . Woodtopia has stood for exceptional expertise and specialized technology.

The Company adheres to integrate R&D with sales both in local and abroad, providing excellent subsequent service through our qualified partner.

Inspiration & Design

- ART
- DESIGN
- DECORATION
- LIFE STYLE

The modern design of our floors is influenced by the latest trends from art, design, decoration style, and lifestyle.

This inspiration is taken up by our design team, we consider floor design R&D as the core and try our best to be a solution provider for our clients, constantly seek new, innovative products.

Quality & Certificates

Woodtopia has obtained CE and Floor Score certification to improve the level of enterprise competition.

The products are produced from high quality and recyclable materials. Meantime, it has dozens of certificates to help better develop into a global international brand.

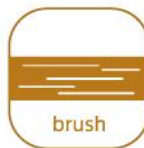

Technology

Woodtopia offers intelligent tongue and groove connections that ensure long-term stability.

To meet the requirements of different customers,we have different technic processes :

Smooth

Wire Brushed

Reactive stain

Hand-scrape

Fumed

UV oil / Hard wax oil

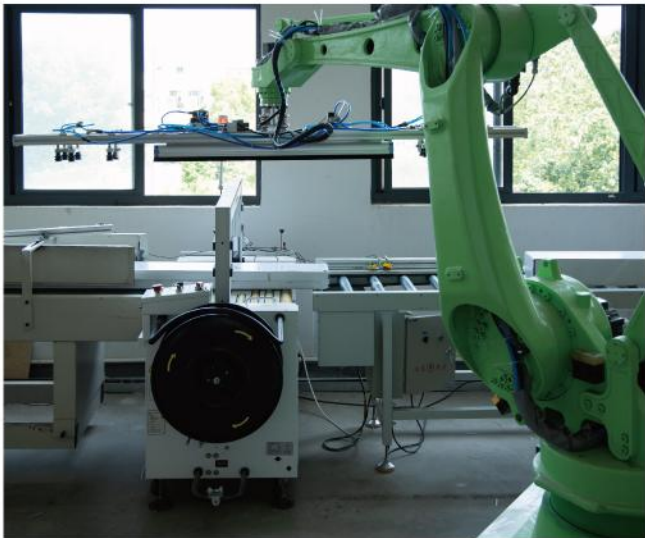

UV lacquer

Stain

Besides, the company's product production reflects the technicalization and digitization.

We have impeccable integrated automatic machinery and digital product management system.

Environmental Protection

Woodtopia has obtained FSC certification and we promote healthy life, our floors are low-emission and eco-friendly.

To create a pleasant living environment, we mainly use natural raw materials which are subject to constant materials review.

Sustainability

As a traditional wood processing company, the high regard for the environment is the foundation of our work. We will set standards in all aspects of eco-friendly production both now and in the future development.

We always have a sense of social responsibility to create a better way of life for the people.

Certified security

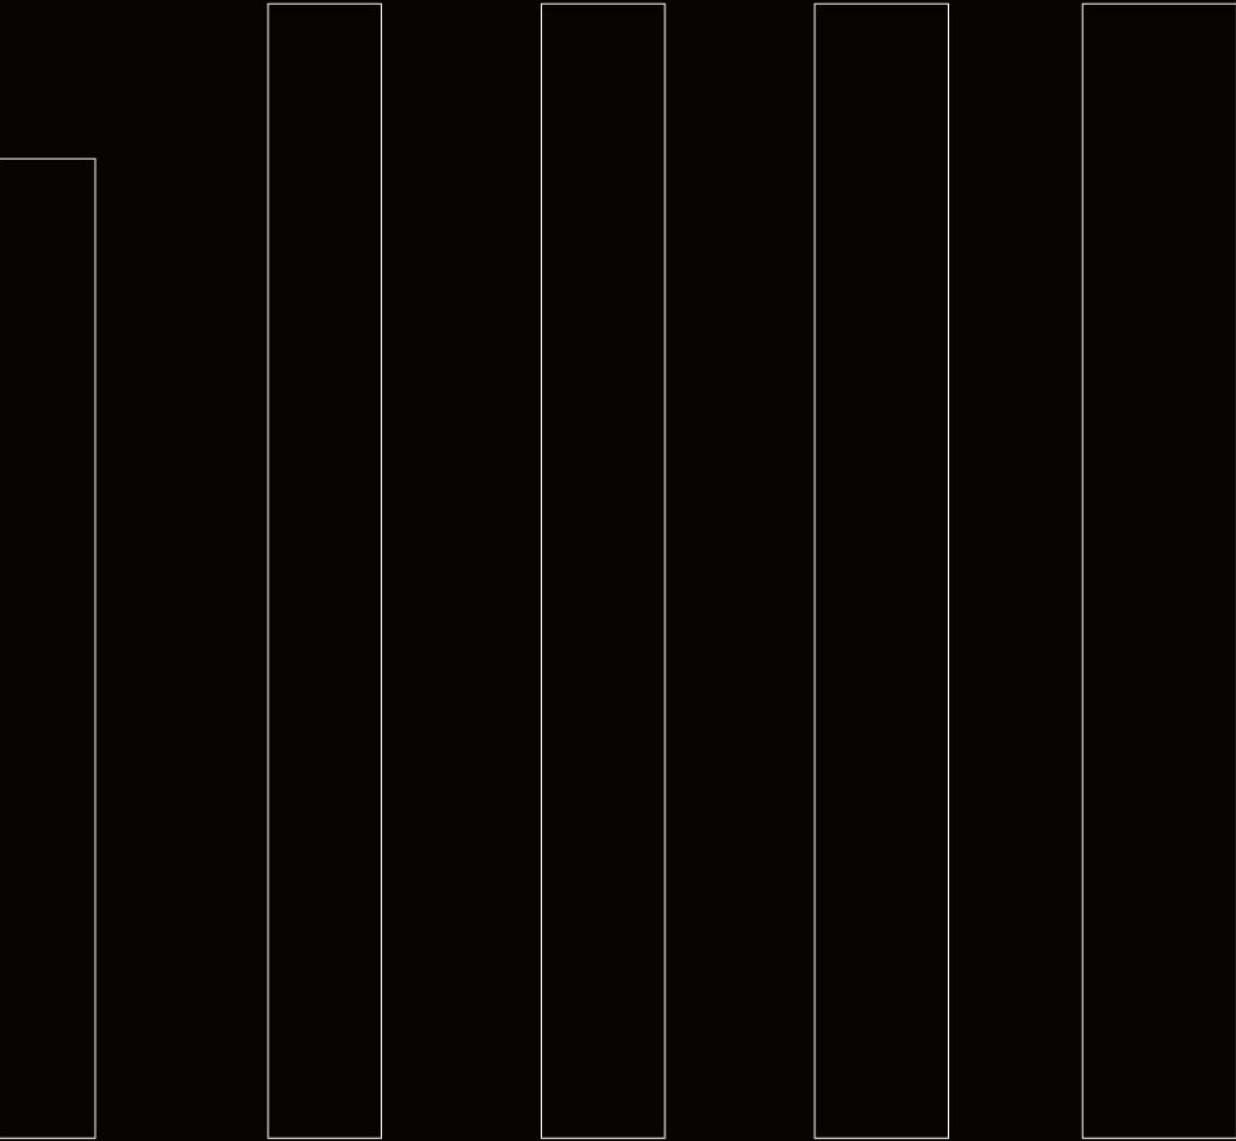

As a brand manufacturer, Woodtopia is fully and continuously certified by independent institutions. Materials, resource, production processes and environmental management, as well as product quality, meet the high corporate values of a brand with responsibility, in addition to the legal requirements.

Our quality requirement for engineered wood flooring goes beyond legal requirements, which is proved by the professional certifications.

Universe

The universe is vast and mysterious. Life in the universe is changing all the time. It's quite similar to our reactive stain products. A reactive wood stain which creates various colors, with color results based on wood species. It can bring out the wood's natural beauty and wood texture. That means the final color is a result of the wood species you're using and it's very different from pigmented stain. All designed with wearability and longevity of course. With the concept of change and newly born, we designed the "Universe" series.

"Universe" series

wearability and longevity

Maya

The Maya civilization was an ancient Indian civilization in Latin America. Although it's in the Neolithic Age, but it had high achievements in astronomy, mathematics, agriculture, art and other aspects, so does the antique oak floorings. The unique beauty of antique oak flooring is overwhelming, therefore we spent time curating a refined selection of timber washes, textures and knots that would look at tribe in any one of them.

Exotic Species

Exotic species refer to those unusual and high quality wood all over the world . The West Indies, Africa, South America— these are just a few of locals from which our exotic wood species originate. As one of the world's gathering place of forest resources, South America is rich in tree species, such as the familiar Cumaru, Jatoba, Tigerwood and so on. Long growth time makes them rare timber species. The excellent stability of Exotic Species makes the flooring hard to deform during use. In addition, the exquisite appearance, clear wood grain as well as great performance of corrosion and insect resistance make it well received in the flooring market.

“Exotic” species

Rare wood species
