

Fudeli Group is headquartered in Shaoxing, Zhejiang, and is one of China's earliest and most internationally mature wood flooring enterprises. Over the years, the company has developed a comprehensive product portfolio, including solid wood flooring, engineered wood flooring, laminate flooring and art parquet.

In 2000, Fudeli expanded into international markets, consistently delivering premium-quality products to clients worldwide. Driven by a passion for premium wood craftsmanship, Fudeli launched its global brand, Woodtopia, in 2016.

Woodtopia is a professional manufacturer specializing in engineered wood flooring. The product range includes planks and an array of parquets, such as herringbone, chevron and other art parquets. Woodtopia's dedication to excellence allowed it to stand out in a competitive market, establishing a strong and trusted brand worldwide.

COMFORT

Embracing the natural hue and grain of wood, the Comfort Collection offers warmth, serenity, and a sense of coming home. Pure, honest, and effortlessly timeless.

Comfort

			
Vibrance	Alpine	Bright	Waterfall
			
Yellowstone	Mont Blanc	Pure	Jasmine

TINCT

The Tinct Series takes its name from the word "tincture"—to tint, to infuse. It symbolizes the gentle permeation of color into the wood's natural grain. Through meticulous color layering techniques, each plank reveals a depth of tone and a quiet artistry. Tinct is not mere surface color—it's a reinterpretation of the bond between pigment and wood: subtle, emotive, and quietly expressive. Designed for spaces that speak with soul and character.

Tinct

			
Merizo	Amazei	Arctic Grey	Lake Zurich
			
Toffee	Apulia	Caviar	

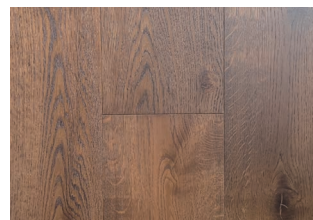

## VEIL

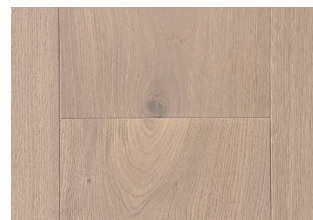

The Veil Series draws inspiration from the delicate presence of mist and the subtle transformation of wood over time. Each plank, treated with a natural fuming process, appears as though gently veiled—rich in depth, uniquely toned, and quietly powerful. Veil is more than a collection; it is an aesthetic statement—understated yet compelling, soft yet strong. Perfect for spaces that embrace calm sophistication and timeless allure.

Bonet

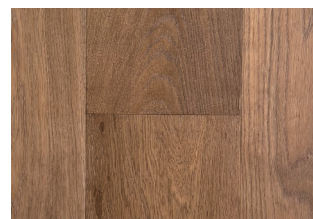

Russet

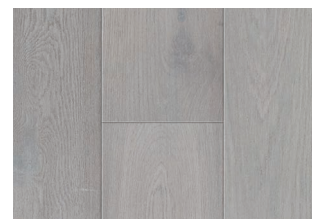

Canyon

Madeira

Marsala

Mountain Grey

## STRUCTURE

Solid wood slat, stabilized by single seasoning and drying process

Gluing with vinyl glue that guarantees zero emissions, elasticity and resistance

Support in birch/eucalyptus plywood for external use, which guarantees greater resistance over the years to thermal changes

**Installation system T&G**  
Tongue and groove joint, which guarantees the possibility of glued or floating installation

**Bevel 4L**  
All our products are micro beveled on 4 sides.

## SURFACES

DEEP BRUSHED

Processing carried out on the noble part of the parquet to highlight the grain. A parquet with a natural and textured effect, perfect for rustic or modern spaces. Thanks to the action of special rotating brushes, the softer part of the wood is removed to obtain a rough surface, with evident veins.

HANDSCRAPED

Processing carried out on the noble part of the parquet, aimed at highlighting the particular effect of the wide planing on the boards. A parquet with a rustic, elegant and live-in flavor with a hollowed out and irregular surface, capable of combining with a classic style, but also with the latest trends in modern design.

SAWN MARK

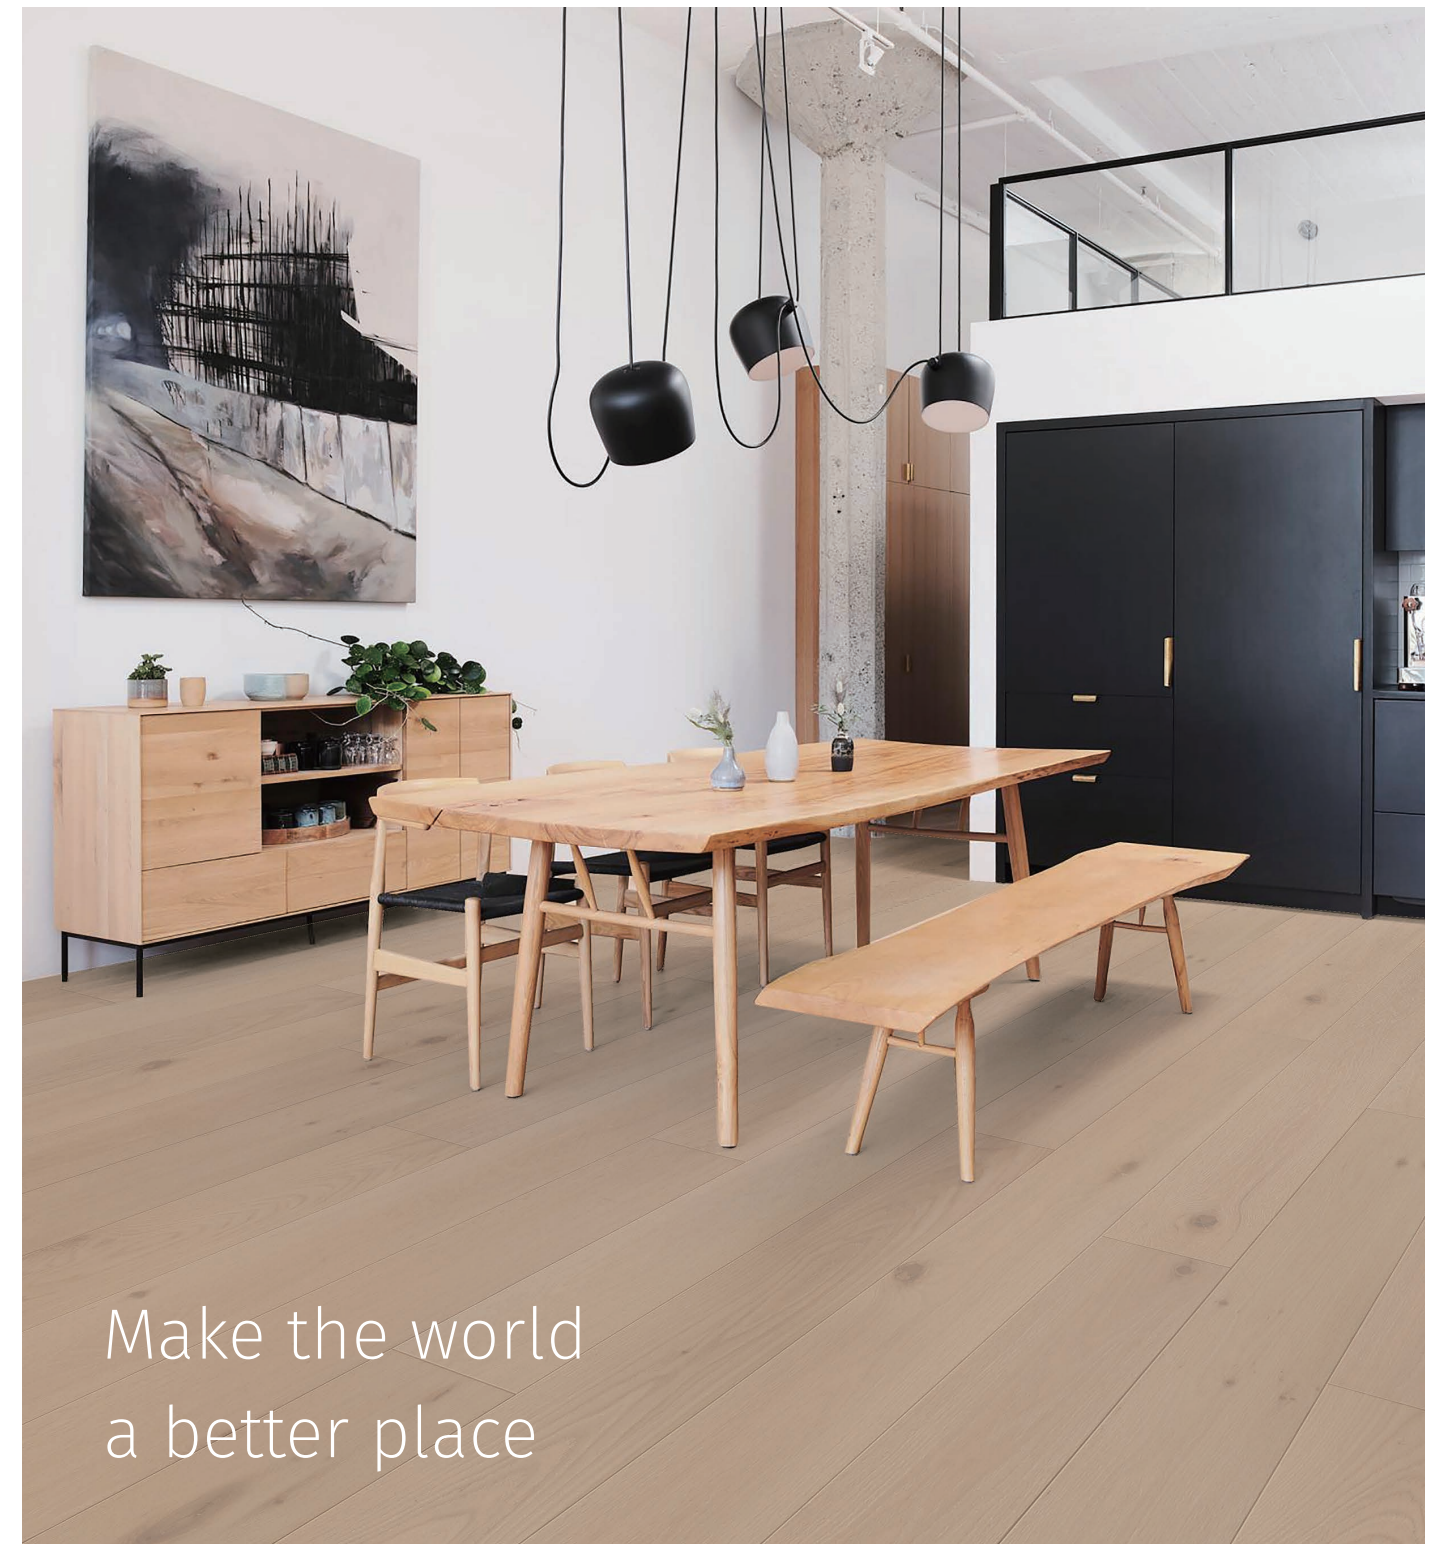

Processing realized on the top layer of the wood, aimed to enhance the irregular cuts of the saw, often preserved for aesthetic effect. These marks lend a raw, industrial vibe, contrasting with smooth surfaces.

3D SURFACE

Unpolished surface that enhances the natural peculiarities of the wood. Processing characterized by embossed knots, repaired with grout, in order to obtain an uneven and not planer surface. The surface gives life to an unforgettable parquet.
